

Swiftie Token Whitepaper

INTRODUCTION

Decentralized liquid swaps and exchanges have many advantages including anonymity and peer to peer transactions. The problem with most fully decentralized swaps is the lack of adequate liquidity pools with an easy user interface. This issue forces clients to use centralized platforms with heavy KYC requirements and a lack of proper authorization.

Swiftie Exchange is a decentralized exchange platform built on the Binance Smart Chain (BSC) blockchain.

Backed by a strong community, Swiftie Exchange has developed a strong reward networking structure. This structure builds the community and enables the growth of

the Swiftie token (SWIFTIE). No one controls the network. It is completely decentralized. Swiftie Exchange hopes to create high liquidity on its swap by using a network marketing structure that highly rewards farming and staking for users.

OUR MISSION

Blockchain and decentralized systems are constantly disrupting the traditional way of doing business.

From finance to the gaming industry, blockchain has found a way to improve current business models and created countless ways to utilize these spaces.

Swiftie Exchange provides an expansive network of income-generating platforms for users. Within the platform, SWIFTIE holders will be able to earn rewards from staking, farming, and play-to-earn gaming. The platform also offers a “Swap” feature with one of the lowest transaction fees in the market today and an upcoming NFT marketplace.

OUR GOAL

Our goal is to create a system of value for all the members of our community and the holders of our token, with utilities that continuously add value to our ecosystem and disrupt the crypto space in a very positive way.

Swiftie Exchange primary goal is to have one million people gain financial freedom. With a high APY of 10,000%, our staking pool can generate an incredible 100x on your investments over a period of 365 days. By holding SWIFTIE, you can earn a reward for every transaction done on the Swiftie ecosystem forever.

SWIFTIE ECOSYSTEM

SWIFTIE SWAP

Swiftie Exchange is using a PancakeSwap router which is an Automated Market Maker (AMM). Swiftie Exchange is also built on BSC (Binance Smart

chain), so users will be trading with a majority of BEP-20 tokens.

LIQUIDITY POOLS

Users can only swap tokens on the exchange if there is enough liquidity for those token pairs. If nobody has added much liquidity for the tokens or tokens users want to swap, it will be difficult, expensive, or impossible to do so. Providing liquidity will get users LP Tokens. Liquidity providers can use their LP tokens to farm other tokens. For providing liquidity to the exchange, liquidity providers earn rewards in the form of trading fees.

YIELD FARMING

Yield farming lets users that are providing liquidity earn SWIFTIE rewards by locking their LP tokens into a smart contract. The incentive is to balance out the risk of impermanent loss that comes along with locking in your liquidity. The APR is at 25,000% and the rate is also controlled by the amount of liquidity in the pool. Users can calculate their rewards using the APR calculator on the platform.

STAKING

Staking allows users to Earn SWIFTIE by simply depositing their tokens in the Staking Pool. It is much simpler than farming because, unlike the farms, you only need to stake one token to start earning: usually SWIFTIE.

The APY rate is currently at 10,000%, the rate drops as the staking pool increases to create better stability of the token and to reduce an oversupply of the SWIFTIE token. As we progress different types of staking pools will be created to optimize and support the system

Liquidity provided by investors can be withdrawn without a lockup period. LP token pairs can be converted back to single tokens and will immediately reflect in the users wallet.

Several farms will be included with the development of the project and new pairs will be introduced to the platform over time

P2E GAMES

Swiftie Exchange offers unique features that will transform the P2E sector allowing members to play avatars games, build virtual worlds, and collect rare, high, valuable NFT to sell on our marketplace.

SWIFTIE TOKEN (SWIFTIE)

SWIFTIE is SWIFTIE Exchange's native BEP20 token empowering the Swiftie Exchange ecosystem. SWIFTIE token is designed to facilitate the decentralized governance of the protocol. As such, holders of SWIFTIE tokens accrue voting rights proportional to their holdings. The SWIFTIE token is a utility token used to provide liquidity, stake, and farm on the Swiftie platform.

TOKENOMICS

The SWIFTIE token has a total supply of 20,000,000 SWIFTIE tokens. This is a substantial proportion and amount of tokens and it is hard to plan out all the incentive programs at first. As our platform continues to grow, users increase and more product feature mature, the subject of value encapsulation will become more.

ROADMAP

Q1 2023

TOKEN CREATION
PRESALE ON PINKSALE
TOKEN LISTING
DEX MAINNET LAUNCH
OPEN POOL & FARM STAKE
LISTING ON COINMARKETCAP & COINGECKO
CERTIK AUDIT

Q2 2023

GLOBAL CAMPAIGN & MARKETING
LISTING ON MAJOR EXCHANGE
(BINANCE, KUCOIN, GATE)
VI APP

Q3 2023

CROSS-CHAIN SWAP
SWIFTIE CHAIN
P2E
More features will be implemented soon.
